To Whom it May Concern,

LA Boxing has been working with ESIX for the past three years. They contacted me and suggested that we consider a group program to provide property and liability coverage's for our franchise gyms. As you can imagine the dynamics of our gyms (boxing, kickboxing, mixed martial arts) can be difficult to place on a standalone basis, so we were pleased when ESIX brought a program that was both comprehensive as well as competitively priced. In addition, they put a program together for our gyms Workers' Compensation exposures. They also handle all of the corporate organizations insurance and risk management programs.

ESIX acts as our Risk Manager for our franchises, providing thoughtful and comprehensive advice to assist in mitigating potential claims, and providing information which helps identify critical risk exposures.

We, corporately, and our franchises, have benefited greatly from the products and services ESIX, and their entire team have provided. We are proud of our partnership with ESIX and would strongly recommend and encourage other fitness organizations to consider their services.

Sincerely,

Anthony Geisler
President
LA Boxing Franchise Corporation
