

To Whom it May Concern:

The Professional Skaters Association has been working with ESIX/Entertainment and Sports since 2002. Throughout our professional association, ESIX has helped our organization automate our insurance enrollment process, making the application for insurance an easier and more efficient process. In addition to the automated system, ESIX assisted in providing additional insurance benefits for our members, while continuing to help maintain stable costs for our members.

In addition to the placement of insurance products, ESIX has been available to assist our members with Risk Management guidance, including the use of Waiver and Release forms, and employment versus Independent Contractor issues. The ESIX team has also been available to consult in regard to potential and actual claims, providing the necessary assurances that a member coach's interests are being protected.

As an organization that places the needs of their members first, we recognize that having an insurance product that is comprehensive and competitively priced is a true benefit to those that we serve. We also recognize that having a partner who can provide the Risk Management guidance for those members provides a win/win situation for all involved.

We would recommend the services of ESIX for member based organizations where delivering a good product and standing behind that product with helpful guidance produces satisfied members.

Sincerely,

Jimmie Santee  
Executive Director
